

Automated Tracking Solutions For Education Fleets

Manage and Watch Driver Activities

- Routes
- Turns
- Arrival times / departure times
- Speed
- Deceleration / Acceleration
- Location (even on housing subdivision roads)

Monitor standard routes, as well as field trips and after-school activities

Dispatch maintenance vehicles “just-in-time”

- Access maps with driver location
- Calculate which vehicle is closest to the applicable location

Prevent Equipment Breakdowns

- Get automated reports on engine performance
- Identify need for preventive maintenance to reduce engine damage and potentially costly breakdowns
- Monitor bus and food service vehicle engine conditions to meet benchmark performance standards

Get Better Data

- Improve your fleet management capabilities with reports that detail actual mileage and vehicle performance
- Get turn-by-turn data on each vehicle by any time period you wish
- Get better fuel data

Stop Report for YCOM 452
